Choosing RAPID 1 shelving

- 1 Choose the width and depth of shelving you want. Check the price grids for nominal dimensions (see page 206 for extra information) - remember to consider the weight loading
- 2 Choose the height of bay you want - standard bay height is 1980mm, but taller bays are available
- 3 Most RAPID 1 bays have four levels as standard - would you like more?
- 4 Choose the shelf material you want
- 5 Finally, choose your colour preference

Choice of colours -

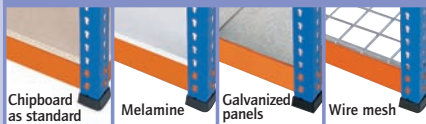

Blue & Grey code: BG

Blue & Orange code: BO

All Blue code: B

All Grey code: LG

Choice of shelf materials -

Chipboard as standard

Melamine

Galvanized panels

Wire mesh

Choice of accessories -

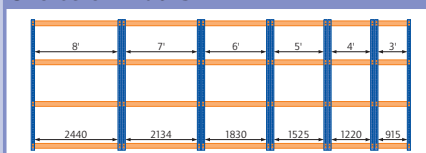

Tie Plates

Floor Fixing Kits

Wall Fixing Kits

Choice of widths -

RAPID 1 Shelf Materials

A choice of four different materials

Chipboard

The most economical shelf material, ideally suited for most everyday applications, Strong and simple, it is available across the entire range of Rapid 1 sizes.

Wire Mesh

Available on selected sizes, wire mesh decks allow free flow air circulation. They may also be specified as a requirement for areas of a building protected by a sprinkler system.

Steel Panels

Made from pre-galvanized steel and available to suit 455mm, 610mm and 915mm deep shelving, these tough long lasting panels are the most durable option for a harsh or damp environment. Individual panels can be easily removed for cleaning. Other shelf depths can be manufactured if required.

Melamine

Melamine faced boards combine the strength and capacity of chipboard decking with a smooth attractive surface that can easily be wiped clean. Available in white for a range of stock sizes.
