

Expandaveyor

A highly versatile conveyor system for use alone or to supplement existing installations in stores, warehouses, assembly lines and vehicle loading or unloading. Easy to position and use, simply wheel to the required location, extend to the required length and lock the castor brakes for maximum stability.

- Very compact when closed for easy space saving storage
- So flexible it can be positioned around awkward corners as well as straight
- Bright zinc plated steel support frames and lattice straps
- PVC or steel rollers or skate wheels
- Adjustable telescopic legs fitted every 1.5m of expanded length
- 125mm pitch when expanded
- Rigid PVC rollers - 50mm diameter, shock proof with ball bearings
- 48mm diameter plastic skate wheels
- Adjustable support legs with 100mm braked castors - 125kg capacity
- Height 650 - 1000mm

Selection and Order Checklist

1. Rollers or skate wheels - wheels are only suitable for articles with firm base.
2. Track width - articles can safely exceed track width by up to 50%.
3. Expanded length - conveyor is operable at any length from minimum to maximum.

NB: Conveyors with an expanded length of 2m are not suitable to make 90° bends.

Roller closed

Skatewheel closed
