

Shelving & Racking

In this section you'll find the widest range of shelving & racking systems, all designed to help you maximise your storage space - from the ever popular premium quality 'Rapid 1 and 2' to more specialised shelving and racking systems.

Choosing your shelving

1. How do you intend to use your storage solution? Think of your stock loading method and whether your loading equipment is compatible with your storage system.
2. What do you want to store? We offer a wide variety of sizes and load capacities to suit any kind of storage requirement.
3. What sort of environment are you operating in? Consider our 'open' systems that are accessible from all sides, or 'closed' systems with sheet steel sides that are ideal for office or small parts storage.

Shelving or racking?

Shelving is hand-loaded, with a bottom shelf to make the bay rigid, and often allows for runs of bays to be created.

Longspan shelving allows beams to 'span' a load stored on the floor, without the need for a bottom shelf.

Racking is typically loaded using a forklift - the Rapid Design and installation service is recommended for racking requirements.

Choices

Different shelf materials are available, with a choice of shelving finishes and colours to suit any use or environment. These options are shown on each product page - if you can't find what you're after, please ask us to provide you with a special quote.

FEM is the European Federation of Storage Equipment Manufacturers

Storage Equipment Installers Registration Scheme

BSI Registered

leading member of the SEMA Distributor Group

To convert inches to mm multiply by 25.4, so 1 inch = 25.4mm
To convert pounds to kg's, divide by 2.205, so 1 pound = 0.45kg

Adjustable Plastic Shelving

Shelving that can grow with your needs.

- Frost/rust proof, lightweight and strong
- Made from recycled plastic
- Shelves are height adjustable
- Self assembly
