Stormor® Shelving

All the benefits of different types of steel shelving have been combined in this truly versatile and interchangeable system

- Shelves and storage accessories are a common fitting to all frame styles
- Adapts as your needs change without compatibility issues
- Accessories feature clip-in fittings for quick and easy changes
- Slim neat profile for co-ordinated appearance
- Choice of colour options and decorative end panels
- BioCote protection
- Frames can be mixed in the same run

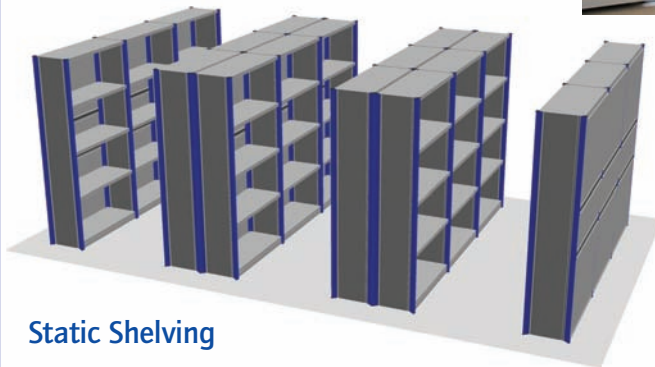

Mobile Shelving

Mobile Shelving Design Service

This range can be mounted on mobile bases, operated on floor mounted tracks. This condenses a shelving layout into a smaller area or alternatively allows for more shelving in a given area. As the shelving moves, only the one aisle is needed. See pages 36-37

Static Shelving

Stormor shelving specified with Stormor grey finish is BioCote protected. BioCote is a proven, patent-protected paint additive which inhibits the growth of potentially lethal bacteria and fungi. This reduces the risk of cross-contamination from surfaces with high contact frequency.

The anti-microbial agent provided by BioCote remains constant on the surface, interrupting the cells ability to function, grow and reproduce. It has been shown to inhibit the growth of organisms such as an E.coli and MRSA, thus forming an effective part of good hygiene practice.

Biocote does not deteriorate and therefore remains effective for the standard life of the painted surface.
