

Stormor® Duo Shelving

All the great features of the Stormor® Solo range but with double skin frames to allow clear access to the full shelf width and eliminate snagging. Ideal for office and archive storage.

- Complies with requirements of BS 5454 - see below for details
- Shelf height adjusts every 25mm
- 6 steel shelves (inc top and bottom)
- Supplied flat packed for easy assembly
- Anti bacterial - BioCote protected
- Extensive range of accessories available - see opposite
- More technical information see page 207
- 370mm deep shelves are designed to hold suspension files

We offer the patent protected BioCote anti-bacterial finish as standard on all internal and external surfaces.

BioCote inhibits the growth of potentially dangerous bacteria and fungi, such as Salmonella, MRSA and E.Coli.

BS 5454:2000 'Recommendations for the Storage and Exhibition of Archival Documents'. To conform with the British Standards for Archives this shelving system is easily adjustable, all steel construction, gives clear access to the whole shelf and provides adequate ventilation.
