

Shelf Plan

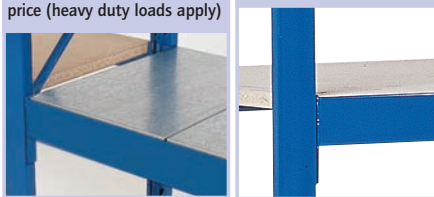

An attractive wide span shelving system that is flush fronted meaning there are no holes visible in the front. This makes it particularly attractive and safe for a retail environment. This is an 'add-on' bay system which means it is particularly good value when you require more than one bay of shelving.

- Levels adjust every 50mm
- Simple bottless assembly
- Order as separate end frames and levels
- Levels available as heavy or extra heavy duty
- Footplates and top caps

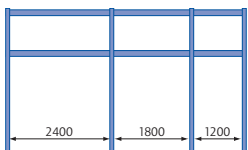

Optional galvanized decking - Just add 50% to heavy duty price (heavy duty loads apply)

Smooth fronted uprights have no visible holes

EASY ORDERING . . .

- 1 Decide which of the 5 heights of frame you need (Note, for one bay - 2 frames are needed)
- 2 Choose which of the 3 widths of levels you need

- 3 Decide how many levels you need - and call us!

Featured shelving consists of 3 frames and 6 levels

Attractive flush fronted uprights
