Rapid 2 has been one of Rapid Racking’s bestselling shelving ranges for over 25 years.

As a popular choice for stockroom, office and workshop storage, Rapid 2 offers you a versatile and durable storage solution for any environment.

**Strong, versatile shelving**

The structure of Rapid 2 shelving is based on common components, which means shelving dimensions can be selected specifically for your space. An entire range of accessories and shelf materials are also interchangeable with this product. From garment poles and louvre panels, to MDF cladding and cantilever shelves – Rapid 2 works for all sorts of storage uses.

As a boltless product, assembly of Rapid 2 shelving is simple and requires only a mallet. For larger orders though, we recommend you use our Installation Service so you don’t have to worry about the assembly of your storage solution.

**Tested to industry standards**

From 80kg to 340kg per shelf (uniformly distributed load). This shelving range has been tested to an independent, industry recognised standard – FEM (European Federation of Materials Handling) to ensure our products are safe and durable for workplace use.

**Perfect for almost any environment**

The versatility of Rapid 2 from its colour and size to its function makes this shelving range ideal for almost any environment – from stockrooms, warehouses and offices, to schools, workshops and more!

With an affiliation to one of the world’s largest shelving and racking manufacturers, we are also able to supply non-standard sizes for very specific requirements.

**The market’s fastest Design Service**

- Free site visits within 24-48 hours
- Free design quotations within 2 hours
- Fast, expert installation

**CAPACITIES FROM**

- **80 - 340 kg** per shelf
**Rapid 2 Structural Components**

**Beams**
- 2mm thick steel beams
- Form the front and back profile and ‘end frames’ of the shelving bay
- Allow shelf panels to be supported on all 4 sides
- Slim 30mm profile allows maximum shelf space
- Shelf decking fits behind the beam for a neat, flush finish

**Uprights**
- 1.8mm thick steel posts
- Punched with keyhole slots that allow beam sections to interlock with the upright for a secure shelving structure
- Weight load can vary depending on the height and number of shelves per bay - please call for safe loading advice.

**Plastic feet**
- An economical solution to protect your flooring when there is no requirement to fix your shelving to the floor
- Spreads the load of the shelving on the angles of the uprights

**Beam Tie**
- Stainless steel bar that connects to the shelving beam
- Ties the front and back beams together for a secure shelving structure
- Used for wider bays of Rapid 2 shelving (1525mm)

**Double steel feet**
- Use for joining shelving bays together
- Secure two bays to the floor at the join of the uprights

**Tie Plates**
- Flat steel plates that join two bays of shelves together securely
- Attach to the keyholes of the uprights

**Wall fixings**
- Provide extra stability to shelving positioned against walls
- Use when floor fixings are not possible

**Chipboard shelf**
- The most economical option
- Shelf capacity: 80 – 340kg

**Melamine**
- Smooth, wipe clean finish
- Shelf capacity: 80 – 340kg

**Steel Panels**
- The most durable option for oily or damp environments
- Shelf capacity: 100 – 188kg

**Shelving colours**
- Blue/Orange
- Blue/Grey
- Blue/Blue
- Grey/Grey
- Galvanized

Galvanized racking is the perfect option for cold stores and workshops

If you would like a specific shelving colour, let us know the RAL colour and we will have it manufactured for you. Please note: price and lead time for custom colours will vary.

Customise your Shelving

**Accessories**

1. **Cantilever shelf**
   End of aisle temporary storage for paperwork or goods to be put away

2. **Retainer Hoop**
   Ideal for storage of awkward items such as ladders and tubes

3. **Location markers**
   Pre-cut, write on, wipe off labels. Supplied in packs of 100

4. **Louvre Panel**
   Attach to the shelving uprights to create a small parts storage area with suspended picking bins

5. **Mesh Cladding**
   Secure goods while ensuring air and light penetration

6. **MDF Cladding**
   Secure small parts or books that may fall off the back or sides of the shelving

7. **Shelving Lights**
   Motion sensor activated lights for accurate picking in dull areas

8. **Notice Plate**
   Store job papers, display load notices and mark aisles

9. **Dividers**
   Create multiple locations on one shelf. Can be located anywhere on the shelf width

10. **Back & Side Stops**
    Clip into shelving uprights to prevent files from falling off the shelf

11. **Garment Beam**
    Galvanized tubes that lock into the shelving upright for hanging garments at the front and back of the bay

12. **Adjustable Rails**
    Galvanized tubes used for storing coils, clothing, or reels within the bay
